Keyboard's shorcuts « F »

- F3 : Exit without saving
- F5 : Save
- F4 : Call choice list

- F2 : Start query mode 
- Shift+F2 : Execute query 

Queries

- Many screens will show you lists, it is possible to filter and order that list.

- You see a list, put your cursor on one field
- F2 > Enter your criterias > Shift + F2

- *Wildcard characters :*

  % matches any string of zero or more characters except null.

  _ matches any single character.

Rinaldi Structal

Queries by example

- **Find an article knowing just partially its name**
  You may query the code and/or designation.

1. Go to **Article/Item** > **Articles'list**
2. Press **F2** to enter query mode
3. In the field designation input **%*knowncode*%**
4. Execute query and get results : **Shift+F2**

Note : You can filter any list by creating a query.
Read the online help for more instructions on queries

You can query one or more columns from the list.…

Queries step by step example

Objet : RE: Aspire Unitised Frame Precommandes
Importance : Haute

Hi Seb & Benoit,

Please find attached the pre-commandes for the unitized frames for EQ (Aspire). We are working of the other items and hopefully will get the pressed aluminium and steel sheet items plus the hooks and spigots to you early next week. We are also working on the steel reinforcements for the end of next week.

If you have any questions please contact
